ACTION PLANS & PRESENTATIONS

**Action Plan:** As a final project, participants will complete a detailed action plan to provide student privacy support and trainings in their sphere of influence. The action plan will include a portfolio of resources, both created as part of the program and by the participant, that they will be able to leverage for trainings.

**Trainings/Presentations:** Participants will put into action what they have learned through the program to become an active voice in communicating about the importance of protecting student privacy. Recognizing the diverse audiences participants have access to, they may choose to present at conferences, train staff, train SEAs/LEAs, and/or engage in other means of formal communication to share their student privacy expertise.
NEXT STEPS FOR ACTION PLANS

1. **Create an online space to build your portfolio.**
   Using an online tool will facilitate others being able to give feedback and review your work. Organize the portfolio (or toolbox) in a way that will provide you quick access to the needed resource or tool.

2. **Begin collecting resources and tools.**
   Possible items for your portfolio: scenarios, case studies, templates, articles, blogs, resources.

3. **Items to leverage**
   As we continue, more resources will be placed [here](#) for you to leverage.
